Aquacultura aposta em mais espécies

mas "esquece" consumidores

por Agência LUSA

SIM OU NÃO AO PEIXE DE AQUACULTURA? MITOS E VERDADES

World Café

A methodology for dialogue and participation that promotes collaboration and the exchange of ideas among participants.

In an informal environment of learning and idea-sharing, participants **move between discussion tables** and, with the support of moderators, **debate different themes**, proposing **concrete actions**.

This dynamic allows for the **collective construction of a shared vision** in an inclusive environment where all opinions hold equal value.

World Café

5 discussion tables were organized to address different sub-themes relevant to aquaculture in Portugal.

Participants discussed and proposed a total of **62 actions aimed at** addressing the challenges and opportunities faced by the sector.

At the end, participants voted on the actions they considered most important. By theme, these are the ones that received the most votes:

Sustainability, environmental and economic performance, animal health and welfare

- Create fiscal incentives for the adoption of greener resources and tax incentives for compliant aquaculture companies.
- Widely communicate to various audiences about production methods and the origin of the product
- > Invest in more sustainable, local, and functional ingredients in fish feed

Licensing, spatial planning, regulatory and administrative framework

- Se Establish an intermediary body to streamline, monitor, and support companies
- Review and organize the territory to ensure better characterization of production areas in relation to investment size, potential species to be produced, environmental carrying capacity, and accessibility
- A Enhance the human/technical resources of public entities responsible for licensing

Competitiveness, investment, diversification, certification, and added value

- 🔊 Invest in processing (filleting, packaging, presentation)
- 🔊 Invest in differentiating the national offer through quality labels
- Shrvest in market research

Communication and social acceptance

- \$\sqrt{\text{lntroduce educational content about aquaculture in schools}}
- 🔊 Create labels for products with additional information beyond the country of production
- \$\times \text{ Invest in media communication}

Science and innovation

- 🔊 Establish a database to foster partnerships between R&D institutions and the industry
- A Organize technical visits by researchers to aquaculture facilities
- 🔊 Hold seminars/congresses to disseminate results to academia, R&D institutions, and industry
